

School Learning Plan 2024-2025

School Context:

(Describe your school, population, geographic location. Community, demographics, and unique needs.)

Pleasant Valley Secondary School is located in Armstrong, BC. It is the only secondary school in the community and serves 510 students in grades 9-12 who live in Armstrong, Spallumcheen, Falkland, and the surrounding area. Some students who live in Vernon and Enderby also choose to attend Pleasant Valley Secondary School. 110 (22%) of our students identify as Indigenous, with 5 students living on reserve, at the Splatstin First Nation. 119 (23%) students have Ministry special education designations. Armstrong has a long history of being a farming community, which is still evident, although the growing population is much more diverse than in the past. The median family income was \$77,500 in 2020, which is below the British Columbia median family income of \$85,000.

Pleasant Valley Secondary is the home of the District Career Program's Hairstyling Dual Credit program, which was revived in February 2022. This is an important program for both our school and the school district, providing training opportunities for 15-20 students per year.

Our unique challenge is that our gym is currently being rebuilt. The construction of the new gym is underway with an anticipated completion in late 2024. This has a profound impact on the Physical and Health Education program, our Athletics programs, assemblies, cultural performances, intramurals, and much more. Our district's Long-Range Facilities Plan includes PVSS becoming a Grade 8-12 school at some point, but that planning is currently on hold.

Strategic Priority: Intellectual Development

- In the School Learning Plan, the **Intellectual Development** goals must be connected to the School District No. 83 Strategic Priority goal – *Each student will develop their literacy skills, numeracy skills, and competencies to become their most capable self.*
- Goals must be specific, measurable, achievable, informed by and supported by data.
- Potential data sources may include FSA results, Graduation Literacy and Numeracy Assessments, Completion Rates (Dogwood Honours/Dogwood/Adult Dogwood/Evergreens/5 Year Rate/6 Year Rate), School-wide writes...

Literacy Goal:	Numeracy Goal:
We will show annual improvement of students achieving proficient or extending on provincial literacy assessments (Grade 10 and 12).	We will show annual improvement of students achieving proficient or extending on the grade 10 provincial numeracy assessments.
Strategies and Actions:	Strategies and Actions:
• Use dedicated staff meeting time to: • Work as a staff to analyze Literacy Assessment results to identify potential areas of growth on these assessments. • Including analysis that considers any achievement gap for our Indigenous students. • Work in departments to identify how departments can help improve these targeted skills for students taking courses within the department. • Develop common lessons to teach study skill strategies for grade 9 students • Work as a staff to determine a method of school-wide goal setting that is consistent and engages students in setting and evaluating personal goals related to their education. • Explore ways to provide academic support to all students either within the school day or outside of instructional time. • Explore ways to implement school-wide systems for staff collaboration as well as classroom teachers with LRTs.	• Use dedicated staff meeting time to: • Work as a staff to analyze Numeracy Assessment results to identify potential areas of growth on this assessment. • Including analysis that considers any achievement gap for our Indigenous students. • Work in departments to identify how departments can help improve these targeted skills for students taking courses within the department. • Develop common lessons to teach study skill strategies for grade 9 students • Work as a staff to determine a method of school-wide goal setting that is consistent and engages students in setting and evaluating personal goals related to their education. • Offer a Transitional Math 9 course to assist students who have had difficulty in math to support the transition to Math 9 or Workplace Math 10. • Explore ways to provide academic support to all students either within the school day or outside of instructional time. • Explore ways to implement school-wide systems for staff collaboration as well as classroom teachers with LRTs.

***Vision:** Preparing students to become educated citizens who contribute to a dynamic, sustainable, and diverse world.*

***Mission:** Empowering students to become confident, curious, and caring individuals who thrive in their learning, relationships, and community.*

***Values:** Belonging, Respect, Empathy, Equity, Perseverance, Reconciliation*

Data to Inform/Support Literacy Goal:

Literacy 10 Assessment					
Year	Emerging	Developing	Proficient	Extending	P/E
2019-20	3.8	30.8	61.5	3.8	65.3
2020-21	6.9	37.6	52.5	3	55.5
2021-22	4.6	29.9	63.2	2.3	65.5
2022-23	6.3	31.3	56.3	6.3	62.6
2023-24	8.3	29.8	54.2	7.6	61.8

Literacy 12 Assessment					
Year	Emerging	Developing	Proficient	Extending	P/E
2021-22	4.2	26.4	61.1	8.3	69.4
2022-23	2	30.7	64.4	3	67.4
2023-24	2.8	34.3	54.6	8.3	62.3

Data to Inform/Support Numeracy Goal:

Numeracy 10 Assessment					
Year	Emerging	Developing	Proficient	Extending	P/E
2018-19	36.2	49.3	14.5	0	14.5
2019-20	32.1	41.5	26.4	0	26.4
2020-21	18.3	62.4	19.3	0	19.3
2021-22	23.6	44.9	28.1	3.4	31.5
2022-23	16.7	49.1	32.4	1.9	34.3
2023-24	14.5	48.4	33.9	3.2	37.1

Data Analysis/Narrative:	Data Analysis/Narrative:
We are interpreting this data through two lenses. The first is though year over comparison of each assessment. Through this lens, overall achievement data for students achieving Proficient or Extending does not demonstrate a trend of improvement although there is some variability each year. The second lens to use in reviewing this data is to compare cohort achievement. Using this lens we do see some improvement for our students between their grade 10 and 12 years. Students who wrote the Grade 12 Literacy assessment in in the 2021-22 school year had 4.1% more students achieving Proficient or Extending when compared to the grade 10 assessment results for the same cohort. We see an even larger improvement when we look at the students who wrote the Grade 12 Literacy assessment in the 2022-23 school year where we see an increase of 11.9% more students achieving Proficient or Extending. We would like to see improvement in both lens’ of interpretation, but each tell an important part of the story. The first in overall improvement in the system and the second in individual student improvement as they approach graduation.	When looking at the Numeracy assessment data, we don’t have same luxury of comparing grade 10 results to grade 12 results as in the Literacy Assessment data. However, in the 5 years of data presented above, there is a clear trend of improvement in the percentage of students achieving Proficient or Extending on this provincial assessment. Although we have seen a significant reduction in the percentage of students achieving Emerging, only a little more than a third of students at PVSS are achieving at a Proficient or Extending level leaving much room for improvement.
Strategic Priority: Human and Social Development - In the School Learning Plan, the Human and Social Development goals must be connected to the School District No. 83 Strategic Priority goal – <i>Each student will feel welcome, safe, and connected to peers and adults in their schools.</i> - Goals must be focused on measuring a sense of belonging. - Potential data sources may include the School District No. 83 EDI Environmental Scan, the Student Learning Survey, and student focus groups.	Strategic Priority: Developing a Culture of Well-Being - In the School Learning Plan, the Developing a Culture of Well-Being goal must be connected to the School District No. 83 Strategic Priority goal – Each student will feel socially, emotionally, and mentally supported within their schools and the district. - The goal must be focused on STUDENT well-being. - Potential data sources may include the School District No. 83 EDI Environmental Scan, the Student Learning Survey, and student focus groups.
Sense of Belonging Goal:	Student Well-Being Goal:
We will show annual improvement of students reporting a sense of belonging and connection to adults on the student learning survey.	We will show annual improvement of students reporting that they are learning to care for their mental well-being on the student learning survey.
Strategies and Actions:	Strategies and Actions:
- Offer three new courses focused on providing a formal mechanism to give students a voice and sense of ownership within the school: Peer Mentoring, Local Politics, and Athletic Leadership to engage students in decision making and implementation of initiatives within the school. Through these courses students will: Create a student-led student council or student feedback mechanism through the local politics class to: - Improve connectedness at PVSS - Review the physical space and how to make the space inclusive to all learners - Provide student feedback to local mayor and council - Student-feedback regarding course offerings Peer mentors will: - Hear what helps students thrive - Support younger students in fostering a sense of belonging in the school and in their classes	- Speak to the importance of mental health and wellness the through common mini-lessons - Investigate the teaching of the Medicine Wheel into student support programs - Include mental health in student self-reflection and goal setting activities - Creating student-led initiatives to work with middle and elementary schools to promote positive mindsets and build community

• Create initiatives to work with middle and elementary schools to promote positive mindsets and build community • Student-led social media presence featuring students as humans • Athletic Leadership students will: • Promote athletics within the school and through a student-led social media presence • Implement an intramural program • Assist with home-game/tournament athletic tasks • Foster positive relationships between and teachers by: • promoting open communication and collaboration • Fostering an environment that encourages approachability as well as caring and effective communication • Create common lessons for classes to co-develop expectations of a PVSS student to help create a positive school culture • Check in with students regularly who are late for classes and disengaged • Promote the development of cross-curricular projects such as French-Foods Café and Carnival, Fine arts gala, music/dance collaborations. • Foster connections with the community to increase a sense belonging for students: • Support community coaches for our teams • Encourage collaboration with community organizations to implement authentic assessment/project opportunities (art shows at the gallery, Climate Action Group, etc.)

Data Analysis/Narrative:	Data Analysis/Narrative:
The data above shows that roughly half of the students at PVSS feel welcome at PVSS and also that they have at least 3 adults that care about them at school. While this is positive, there is much room for improvement as there are still roughly half of our students that that did not respond positively to these questions. Even more concerning is that while half of students feel welcome at school, only roughly one third of students feel like PVSS is a place where they belong. We would like to see an increase the positive responses to all of the above questions on the student learning survey.	We continually hear from our students that they are struggling with their mental health. The data above from the student learning survey corroborates this by showing that roughly one third or our students report their mental health as poor. Knowing this, we can do a better job as a school community teaching our students about mental health and strategies to promote positive mental health as less than 20 percent of students report learning these skills at school.
Strategic Priority: Career Development • In the School Learning Plan, the Human and Social Development goals must be connected to the School District No. 83 Strategic Priority goal – <i>Each student will develop the skills and competencies to be successful in a career pathway of their choice.</i> • In the secondary years, there are two goals: ○ Career Exploration and Development: opportunities for dual credit programs, ensuring pathways of eligibility, ensuring access for priority learners... ○ Meaningful Graduation: successful transitions from Grade 10-11 in Salmon Arm schools, graduation credentials that allow students to transition into the adulthood of their choice whether that is the workforce or post secondary, reduction in Adult Dogwood rates, reduction in rates of students taking Workplace Math, special attention to supporting priority learners... • Potential data sources include completion rates, Student Learning Surveys, Dual-Credit enrollment rates, processes for placement of students on Adult Dogwood and Evergreen tracks, exit interviews for graduates, post-secondary transition rates, grade to grade transition rates, course completion rates, per-student FTE...	
Career Exploration and Development Goal:	Meaningful Graduation Goal:
We will show annual increase of students participating in Dual Credit, Youth Train in Trades, Youth Work in Trades, and Work experience programs.	We will show annual increase of number of students graduating with a Dogwood and show an annual reduction of number of students graduating with workplace math 11.
Strategies and Actions:	Strategies and Actions:
• Create a timeline and activities, by grade, for the promotion of dual credit and other “new ways to graduate”. • Host a parent night to promote “new ways to graduate” opportunities • Facilitate connections to local industry and businesses through the chamber of commerce	• Offer a Transitional Math 9 course to assist students who have had difficulty in math to support the transition to Math 9 or Workplace Math 10. • Offer a Foundations of Math 11 course as an alternative to Workplace Math 11 for students who may not be successful in a Pre-Calculus 11 class. • Explore ways to provide academic support to all students either within the school day or outside of instructional time. • Continue to place students in math classes based on teacher recommendation and not student self-selection • Engage students in grade 10, 11 and 12 in reviewing their Diploma Verification Report to ensure that they are involved in their own assessment of on-track graduation.

Data to Inform/Support Career Exploration and Development Goal:						Data to Inform/Support Meaningful Graduation Goal:																
Number of students participating in dual credit programs			Number of students with work experience placements			Math Requirements for Post Secondary																
Year	Total Students	Indigenous Students	Year	Total Students	Indigenous Students	Year	WPM 10	WPM10 %	FMP 10	FMP 10 %	WPM 11	WPM 11 %	FOM 11	FOM 11 %	PRE 11	PRE 11 %						
2021-22	8	2	2023-24	64	14	2019-20		30.0		70.0		36.00	0	0.00		64.00

2023-24	15	2				2021-22		33.0		67.0		48.00	0	0.00		52.00						
						2022-23	43	32.6	89	67.4	39	37.14	0	0.00	66	62.86						
						2023-24	39	32.0	83	68.0	47	35.61	31	23.48	54	40.91						
Data Analysis/Narrative:						Data Analysis/Narrative:																
This is a new goal at PVSS. Through the strategies and actions listed above, we hope to see an increase in number of students participating in both career programs and work experience. We would also like to see participation of Indigenous students in these programs at a rate proportional to their representation in the school community.						Meaningful graduation has a different meaning for each student graduating. As educators, we are defining meaningful graduation as students achieving their highest academic potential providing them with the most post-secondary options possible for them in their future. To measure this grad rates must be considered with the data set above. Our first priority is to ensure that we are increasing the number of students completing secondary school. This may include students completing the adult grad program rather than non-completion. The next priority is to increase the number of students completing school with a dogwood certificate. This would include moving students achieving an evergreen or adult grad completion to a dogwood certificate whenever possible. Increases in this priority will create an increase in the number of students taking Workplace Math 10 and 11. Our third priority is to reduce the number of students taking Workplace Math 10 and 11 for students graduating with a dogwood certificate while achieving final grades that meet post secondary entrance requirements. This provides students with more post-secondary options in their future without the barrier of upgrading their math course.																
Resources and Professional Learning						School Learning Plan Consultation Process																
Identify specific learning, resources, or initiatives at the school and/or district level that will build staff capacity to work toward school goals.						Please describe the consultative process with rights holders and stakeholders in the development of this School Learning Plan.																
- Time will be dedicated to professional learning/collaboration at each teaching staff meeting. - A group of staff will continue their participation in the Behaviour Code learning series and bring their learning to staff during time dedicated at teaching staff meetings and/or School-based professional development days. - School budget will be reserved to support teaching staff who wish to pursue community connections and authentic learning/assessment for their classes within the community. - Investigate pro-d opportunities with the PVSS pro-d committee to support teachers with addressing mental health and well being with students and how to incorporate these practices into core curriculum.						The process for the development and implementation of the school learning plan is an iterative process. The 2023/24 school year saw a change in the template and goal requirements as the district undertook the development and adaptation of a new strategic plan. These significant changes lead to a deviation from the usual consultative process outlines below. This year, goals and strategies were developed by school administration though significant discussions with school staff at our regular teaching and CEA meetings. Moving forward, the process outlined below will be used to solicit and incorporate greater stakeholder feedback into the school learning plan. <table><tr><td>Sept - Nov</td><td>Present the school learning plan to rights holders and stakeholders to initiate the review process and outline the feedback process</td></tr><tr><td>Dec - Jan</td><td>Focus group meeting #1 to discuss future areas of growth and discuss strategies presented in the plan.</td></tr><tr><td>Jan</td><td>Data collection and analysis (i.e. demographics, academics, surveys)</td></tr></table>											Sept - Nov	Present the school learning plan to rights holders and stakeholders to initiate the review process and outline the feedback process	Dec - Jan	Focus group meeting #1 to discuss future areas of growth and discuss strategies presented in the plan.	Jan	Data collection and analysis (i.e. demographics, academics, surveys)
Sept - Nov	Present the school learning plan to rights holders and stakeholders to initiate the review process and outline the feedback process																					
Dec - Jan	Focus group meeting #1 to discuss future areas of growth and discuss strategies presented in the plan.																					
Jan	Data collection and analysis (i.e. demographics, academics, surveys)																					

	Feb	Share the summarized feedback and analysis with rights holders and stakeholders
	March	Focus Group meeting #2 to review summarized feedback and analysis and to reaffirm/update performance targets and strategies.
	April	Share draft school improvement plan with rights holders and stakeholders and provide opportunities for feedback
	May - June	Finalize Draft School Learning Plan.
